Summary

Senior Full-Stack Web & Mobile Developer with 5+ years of experience building scalable, high-performance applications across fintech and consumer platforms. Proficient in **React (Web), React Native and Flutter (Mobile), Node.js, Express, FastAPI** with strong backend expertise in **MongoDB, MySQL**, and API-driven architectures. Skilled in **state management, advanced mobile animations, secure authentication, and payment gateway integrations**, with end-to-end ownership of **CI/CD pipelines, automated testing, and cloud deployments on AWS & GCP** to deliver robust, production-ready systems.

Experience

Software Engineer (Java (Springboot) + Angular + React Native)

Feb 2026 – Present

Royal Development for Gas Works - Abu Dhabi, UAE (Onsite)

- ❖ Responsible for End to End Mobile + Web Development and Deployment on respective platforms (Playstore and AppStore)

Full Stack Developer (MERN)

Apr 2024 – Dec 2025

Escorts Kubota Limited - Faridabad, India

- ❖ Designed, developed, and maintained enterprise-grade **Web and Mobile Applications** using clean, modular architecture.
- ❖ Deployed apps on **AWS** with **CI/CD pipelines** for automated and efficient delivery.
- ❖ Optimized **APIs and database calls** using **Redis** for faster and more efficient performance.

Full Stack Developer (React.js + FastAPI + Flutter)

Feb 2021 – Apr 2024

Leanports Software GmbH - Französische Straße 20 , Berlin (remote)

- ❖ Developed **full-stack web and mobile applications** and automated their deployment.
- ❖ Designed **FastAPI microservices** and guided team juniors on frontend integration.

Projects

EKL Trip Tracker | Tracking and Claim Management

[Link](#)

- ❖ Built a cross-platform **React Native** application with a clean, scalable architecture and reusable widget system.
- ❖ Implemented state management using **Redux/ Context API** to handle trip state, claims, and real-time updates efficiently.
- ❖ Integrated **Google Maps SDK** for Flutter and device GPS/geolocation for live trip tracking, route visualization, and distance calculations.

CyberProbe | VAPT Scanner

[Link](#)

- ❖ Developed a VAPT (Vulnerability and Penetration Testing) tool to detect web and API vulnerabilities.
- ❖ Built frontend with **React + Vite** and backend microservices with **FastAPI**, integrating Google authentication.

Serv Genie | AI Chat Bot

[Link](#)

- ❖ Designed, developed, and deployed an AI chatbot for Escorts Kubota, reducing support time and resources.
- ❖ Used **Redis** for fast API responses and Azure Cognitive Search to train the AI on support documents.

Skills

Programming Languages: Javascript, TypeScript, Java, Objective C, Kotlin, Dart, Python , HTML, CSS, ASP.NET

Frameworks & SDKs: React , React Native, Flutter, Redux, Django, Flask, FastAPI, Node.js, Express.js , Springboot, Angular

Testing: Widget, Unit, and Integration Testing, API Testing (Flutter Test, Mocha, Chai)

Tools & Utilities: Git, GitHub, Postman, Android Studio, Xcode, Figma , UI/UX, VS Code

Database : MySQL, MongoDB, Postgress, Firestore, Redis

Cloud & DevOps: AWS, DigitalOcean, CI/CD pipelines, Docker, Firebase ,DNS management, server provisioning

Education

B.Tech Electronics and Communication (CGPA: 8.1)

Aug 2019 – Aug 2023

GB Pant Government Engineering College, Delhi , India
