Overview

Application Security Engineer with 4+ years of experience in secure software development and penetration testing. Skilled in identifying and fixing vulnerabilities across web, cloud, and microservices environments. Proficient with tools like Burp Suite, OWASP ZAP, and Nessus, and experienced in scripting with PHP, Node.js, and BASH. Strong understanding of secure coding, CI/CD, and cloud platforms like AWS and Docker.

Experience

Application Security Engineer

Apr 2024 – Present

Escorts Kubota Limited — Faridabad, India

- Performed penetration testing on internal applications, cloud infra, and APIs using **Burp Suite** and **OWASP ZAP**.
- Led the secure development and rollout of EKL Trip Tracker, integrating encrypted tracking and auth flows.
- Automated security scans in CI/CD, collaborated with dev teams to resolve critical vulnerabilities efficiently

Software Engineer – Mobile & Web (Flutter | React | Node.js)

Aug 2023 – Apr 2024

Leanports Software GmbH — Französische Straße 20, Berlin

- Led secure mobile development for “Tellme Live” and “IPB” with Firebase Auth and secure cloud integration.
- Supported backend hardening in Node.js APIs and React admin panels, enforcing secure coding practices.
- Conducted **unit** and **widget testing** with 95%+ test coverage while ensuring secure data handling throughout.

Software Engineering Intern

Apr 2021 – Aug 2023

Leanports Software Solutions Pvt. Ltd — Noida, India

- Developed secure mobile apps with Flutter, focusing on performance, clean architecture, and input validation.
- Integrated RESTful APIs using **.NET** and **MongoDB**, applying basic security checks and token-based auth.
- Supported vulnerability assessments, debugging, and patching efforts under senior engineering guidance.

Education

B.Tech Electronics and Communication (CGPA: 7.9)

Aug 2019 – Aug 2023

GB Pant Government Engineering College, Delhi, India

Projects

EKL Trip Tracker | Tracking and Claim Management

[Link](#)

- Built React.js frontend and .NET backend with Google Maps API and Geolocation, secured using **HTTPS** and **JWT**.
- Integrated role-based access control and encrypted data storage; validated inputs to prevent injection attacks.
- Performed **DAST** using **OWASP ZAP** and **Burp Suite**; patched vulnerabilities before deployment on app stores.

TELL ME LIVE | Social Networking and Job-Seeking Platform

[Link](#)

- Flutter app with real-time messaging and job feeds secured via Firebase Auth, Firestore Rules, and **HTTPS**.
- Implemented backend with **.NET** using **OWASP** guidelines; added logging, rate limiting, and secure API access.
- Conducted **SAST** and penetration testing using tools like **SQLMap** and Arachni; remediated findings.

IPB | IoT-Based Medication Reminder

[Link](#)

- Developed a Flutter app for smart medication reminders with notifications to users and family members.
- Implemented backend APIs using .NET for device integration and data management.

Skills

Programming: JavaScript, C#, C++, PHP, Bash, Node.js

Frameworks & Libraries: .NET, React, Flutter, Express, Mocha, Firebase Functions

DevOps & Cloud: Docker, AWS, Kubernetes, Bitbucket CI/CD

Databases: MongoDB, Firebase, MySQL, Redis, SQL Server

Security Tools & Techniques:

Burp Suite, OWASP ZAP, SQLMap, Nmap, Nessus, Arachni, MSF, SAST/DAST, JWT, OAuth, HTTPS, Penetration Testing, Input Validation, Rate Limiting

Other Skills:

Secure Coding (OWASP Top 10), Social Engineering Simulations, Data Structures & Algorithms, OS Concepts, Networking, API Security, TLS, ISO 27001/NIST Awareness

Achievements

Contributed to the official Flutter docs repository; Merged PR in Flutter docs repository with 3K+ contributors
